– Where the breeze
blows best*

- Left and right hand louvres can be set for different directions
- Rear louvres can be set for air shut-off or for adjusting vertical air flow

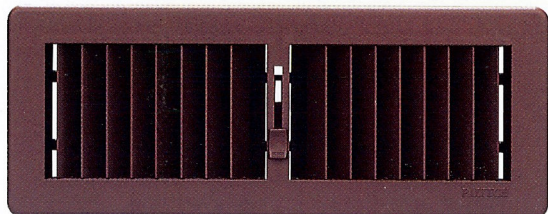

- Ideal vent for wall or ceiling mounted heating or cooling
- Four colours

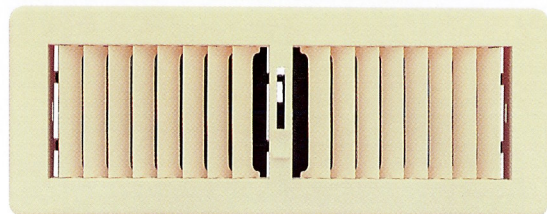

PALTECH
MULTI DIRECTIONAL REGISTERS

DirectAir™ Versatile Multi Directional Registers for your heating and cooling systems

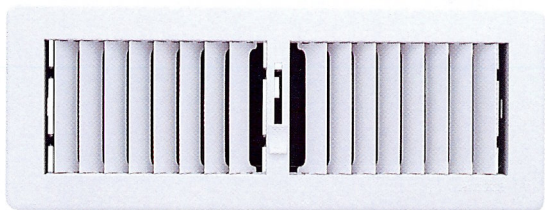

Paltech 'DirectAir' Multi Directional Registers feature fully adjustable louvres delivering air where and when you want it. The left and right louvres can be independently set to direct horizontal airflow. The front button provides easy control of the rear louvres used to open or shut-off the register and direct vertical airflow.

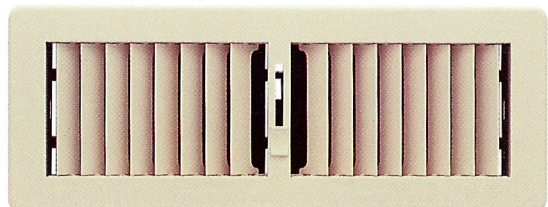

Mission Brown

Cream

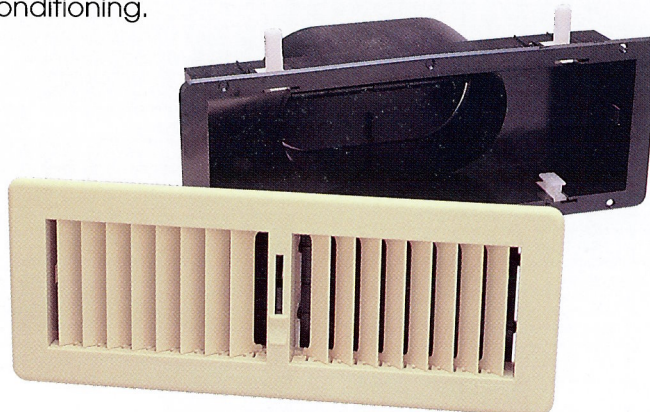

White

Beige

The 'DirectAir' register's flexible airflow options allow it to be conveniently installed in a wide range of positions. In a typical ceiling installation louvres can be set to jet air downward for maximum heating efficiency or turned sideways for air dispersion for air conditioning.

The 'DirectAir' register is available in 2 sizes and 4 decorative colours. The contemporary styling of the 'DirectAir' features rounded edges to enhance any decor. The low profile design of the louvres ensures a sleek unobtrusive appearance.

'DirectAir' has been developed with the installer in mind...the new patented 'Loc-it-in' mounting system works in the widest range of plaster (including 20mm double panel) making it simple to operate and easy to install.

Ceiling and wall applications

Register Sizes	Duct Adaptor Sizes	
300 x 100	150	200
350 x 150	200	250

The Paltech 'DirectAir' Multi Directional Register is designed and manufactured in Australia to the very highest standards, and is covered by a ten year unconditional replacement warranty to be free from manufacturing defects.
