

Motorised Damper Wiring

240V models - wiring difference between Paltech and ConnectAir

Function	Paltech	ConnectAir
Neutral	Blue or Grey	Blue
Open	Brown	Black
Close	Black	Brown

ConnectAir 24V models

The 24V CA comes with a 9m lead with RJ12 plugs on each end

To convert this to a 3 wire fly lead

Cut off one of the RJ12 plugs on the 9m lead and expose 6 wires

White wire with Orange stripe - Neutral

White wire with Green stripe - Open

White wire with Blue stripe - Close

Orange, Green and Blue wires - N.C. (These are only used when connected to a CA control system)

Note: Wire colours used on the separate CA 1metre 24V adaptor lead are different to the above 9metre lead
